

How to check your balls (testicles)

Symptoms, Screening and Staying Healthy

Introduction

This booklet uses easy words and pictures to help you get information about cancer.

You might want someone to help you look at the booklet so you can talk about it.

There is a Word Bank at the back of the booklet to help with hard words. Any words in **bold** you can find in the Word Bank.

This booklet can help you learn about cancer. But this is not the same as talking to your doctor. If you are worried about your health, you should talk to a doctor or nurse.

How to check your balls (testicles)

A common cancer for men aged 15 to 45 is cancer of the balls (**testicles**).

You should check your balls at least **once a month** for lumps or swellings.

Cancer of the balls is easier to treat if you find it early.

How to check your balls (testicles)

It is best to check your balls when you are warm and standing up. This could be after a bath or shower.

Before checking your balls, make sure you are somewhere private.

Every man's body is different. You should know what is normal for you.

How to check your balls (testicles)

How to check your balls

To check your balls, cup your hand under them to feel how heavy they are.

Then carefully check for any lumps or changes in size. Roll each ball between your finger and thumb.

They should be almost the same size and weight.

How to check your balls (testicles)

There may be something wrong if:

- You find a lump

- There is a swelling, or if one ball is a lot bigger than the other

- There is pain when you touch them

How to check your balls (testicles)

If you have any of these symptoms you need to go to your doctor straight away.

You may feel shy when talking about what is wrong. But it is very important to get checked.

If it would help, you might want to go to the doctor with support.

How to check your balls (testicles)

You can ask to see a male doctor if you would prefer.

Word Bank

Volunteer and Illustrator with learning disabilities

Word Bank

Screening

These are special tests that can sometimes find cancer early.

Symptoms

Signs in your body that tell you something is wrong, like feeling tired all the time.

Testicles

The testicles (or balls) are behind the penis in a pouch of skin. Semen and sperm are stored in the testicles.

Notes

A series of horizontal dotted lines for writing notes.
